

XID8300 Firmware Upgrade Process (Requires installed USB printer driver and Status Monitor)

On the Printer:

1. Press the MENU button 4 times. You should now see >DOWNLOAD on the printer LCD.
2. Press the ENTER button. You should now see >DOWNLOAD READY.

On the Computer:

3. Run the Status Monitor as an Administrator. (Right Click > Run as administrator)
4. Click on the “Others” tab.
5. Underneath “Firmware Download”, browse to the location of the firmware file.
6. Select the .prf file. (XID8300_V01-60B.prf)
7. Click Start.
8. At the prompt click “OK”.
9. The printer screen will change to “Downloading...”
10. The Status Monitor will display “Update firmware success. Please restart machine!”.
11. Click “OK”.

On the Printer:

12. Once the printer screen displays > DOWNLOAD READY, press the EXIT button.
13. Reboot the printer.
